# PAPRIKAS

Pepper is a vegetable from which a seasoning can be made with various degrees of piquancy - from mild to a decisively hot flavour. Sweet peppers/paprikas are appreciated for their beautiful and deep colour, owing to which each dish becomes even more appetizing, while hot paprika is chosen by lovers of pure flavour and strong culinary accent. Paprika is also an excellent addition to goulash. It is also perfect for all kinds of meat, fish and vegetable dishes, soups and sauces and for dish dressings.
